Founding President of Emirates Intensive Care Society (EICS)
President International Pan-Arab Critical Care Medicine Society (IPACCMS)
Board member Emirates Resuscitation Council
Consultant, Head of Directorate Emergency and Critical Care
Alzahra Hospital, Dubai

PORTFOLIO

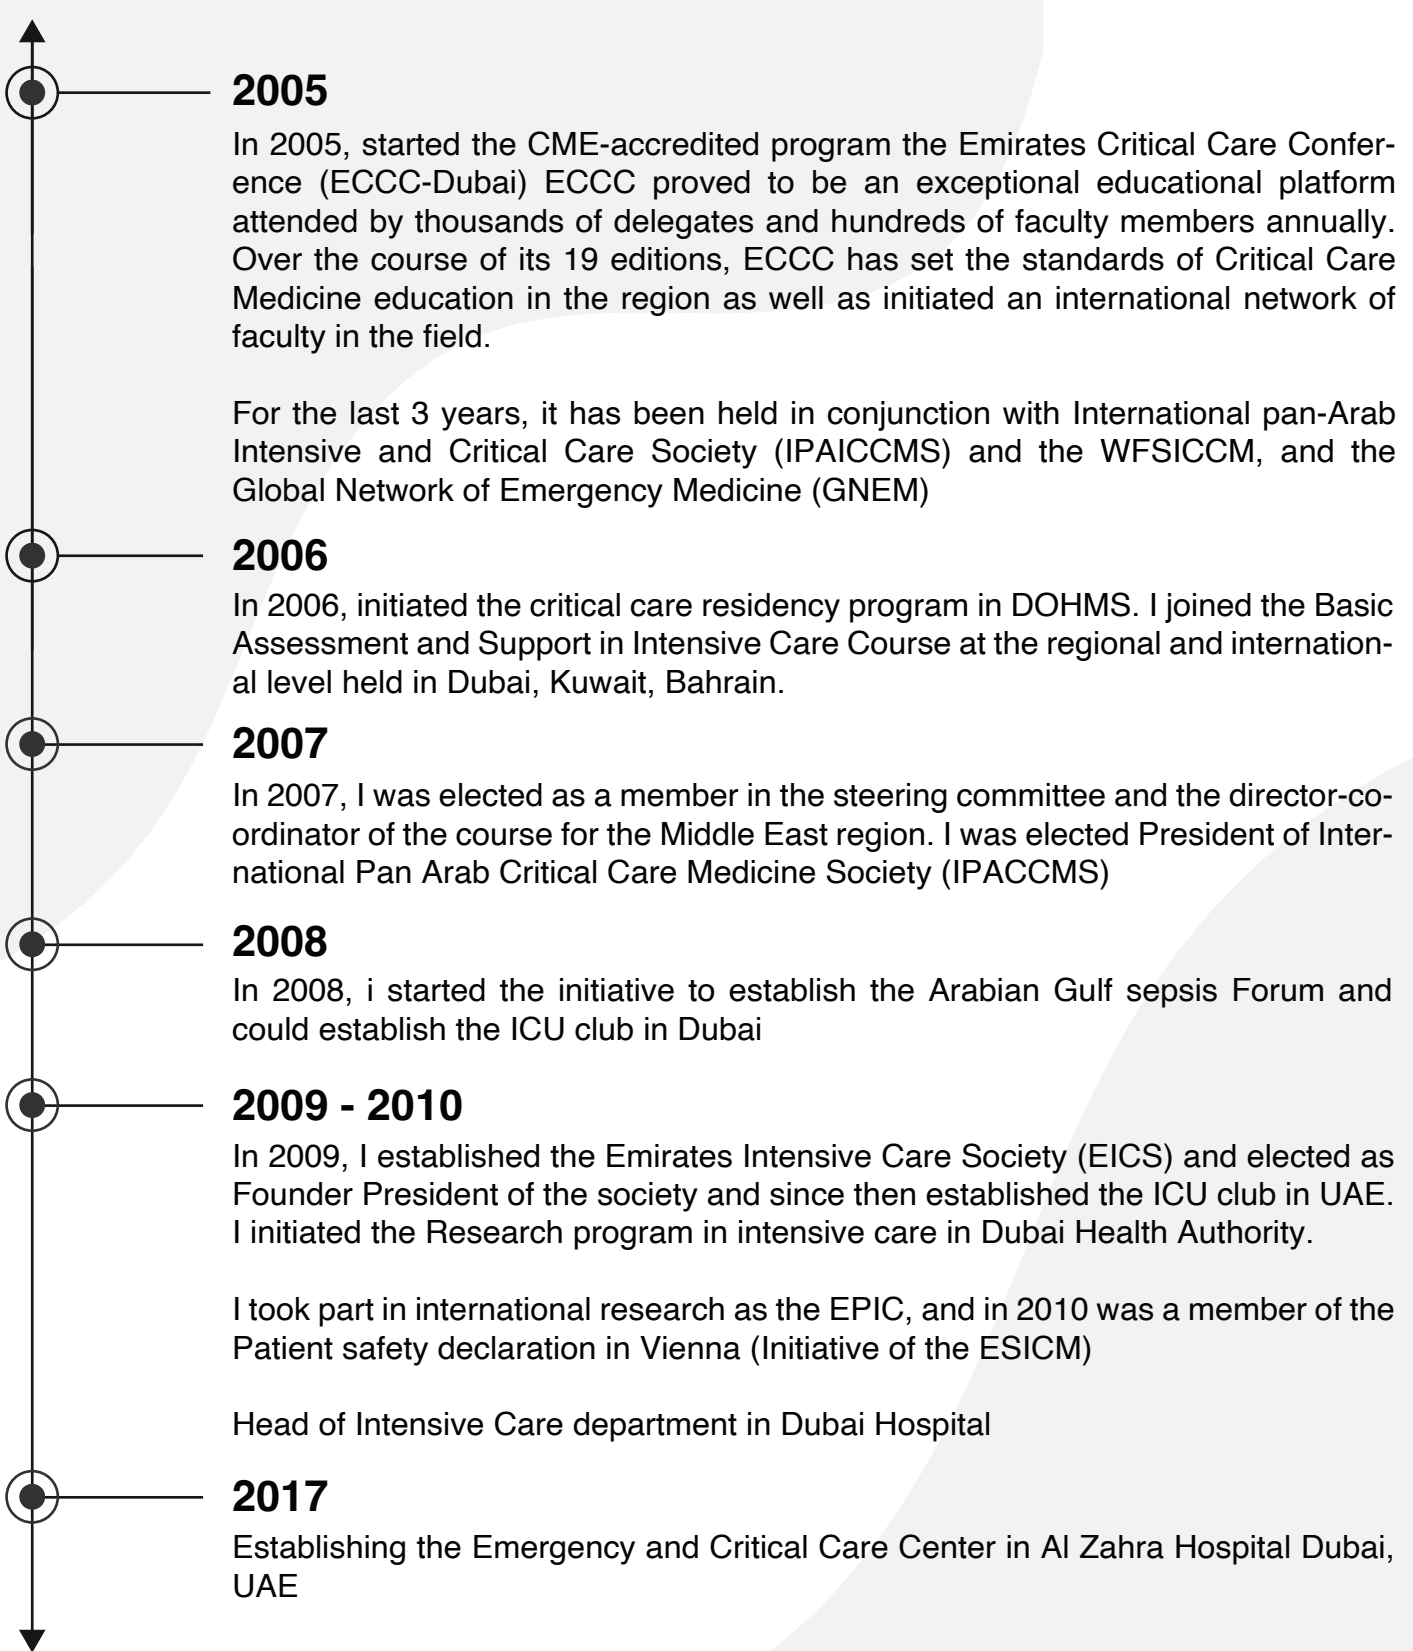

After completing my German Board certificate in Internal Medicine in Germany (University Khinikum-Essen 1997) I came back to my country (UAE) and joined the Department Of Health and Medical Services-Dubai-UAE and Rashid Hospital.

Rashid Hospital is a 500-bed university hospital with multidisciplinary departments and considered the biggest Trauma level 1 in the country. Within three years, I established the first multidisciplinary independent ICU with fully trained intensivists in the UAE.

I trained physicians as well as nursing teams to be able to formulate a unit team that could work together. Founded the department of Emergency and Critical care in 2002. Later, I worked on the development of the ambulance department and initiated the training and certifying of Dubai ambulance.

Within 2 years, I took part in establishing the paramedic program in Dubai Women College of Technology and was appointed as the medical director for the program.

The EICS was selected as member of the Global Sepsis Alliance and the Surviving Sepsis Campaign. Member of the steering committee for BASIC

Co-Writer

- Polytrauma team, Guidelines (Antifungal, hypothermia, VAP, CLBSI, UTRBI)
- Basic Assessment and Support in Intensive Care
- World Brain Death Project (Determination of brain death by clinical criteria)
- SEPSIS Guidelines
